### Reasons For Allowance

*None of the references disclose alone or in combination an optical fiber cable assembly comprising an optical fiber slidably enclosed within a hollow tubing, both the fiber and the tubing having corresponding first and second ends. The tubing is made of material which contracts more than the optical fiber when the cable is exposed to temperatures below the first temperatures, such that the fiber is longer than the tubing and excess fiber length is formed and also fiber receiving device permits the excess fiber length to accumulate without bending in a radius in a radius smaller than a minimum bend radius.*
